Mobile: +2349035193248
Ogun State, Nigeria

PROFESSIONAL SUMMARY

Full-Stack Developer with experience building responsive web applications using React.js, Node.js, Express.js, FastAPI, and MongoDB. Skilled in designing intuitive user interfaces, developing secure REST APIs, and delivering end-to-end solutions from concept to deployment. Passionate about building scalable, user-focused software while continuously expanding expertise in backend systems, cloud technologies, and modern software engineering practices.

EDUCATION

Babcock University, Ilishan-Remo, Ogun State, Nigeria
Bachelor of Science – Computer Science; CGPA: 4.42/5.00

Sep. 2022 – July 2026

SKILLS SUMMARY

Frontend: React.js, Tailwind CSS, Bootstrap, Vite, Component Architecture, State Management, Responsive Design, Accessibility (WCAG)

Backend: Node.js, Express.js, FastAPI, REST API Development, JWT Authentication

Programming Languages: JavaScript (ES6+), Python, HTML5, CSS3

Databases: MongoDB, SQLite, Database Schema Design

Cloud & DevOps: Docker, Git, GitHub, Deployment

Developer Tools: Postman, Jira, Chrome DevTools

UI/UX: Figma, Wireframing, High-Fidelity Prototyping, Design Systems, User Research, Usability Testing

WORK EXPERIENCE

UI/UX Design Intern | CWG PLC, Lagos, Nigeria

Jan. 2025 – Feb. 2026

- Designed responsive interfaces and wireframes for internal enterprise tools, improving workflow clarity across teams.
- Partnered with developers and product managers to raise usability and accessibility standards across live applications.
- Built interactive high-fidelity prototypes in Figma, reducing design-to-development handoff friction.
- Applied Python fundamentals to support internal automation tasks within the design workflow.

Software Development Intern (I.T) | 720Degree Innovation Hub, Abeokuta, Ogun State

Jun. 2024 – Sept. 2024

- Built multiple frontend projects using HTML, CSS, JavaScript, React, and Bootstrap, strengthening component-based UI architecture.
- Built responsive React interfaces with reusable UI components, integrating REST APIs across multiple frontend projects.
- Won Best Project award 3× across Weekly Pitching Presentations, recognized for technical execution and product thinking.

PROJECTS

InternTrack | React, Node.js, Express, MongoDB, Tailwind CSS

2024 – 2025

[Live Demo](#) • [GitHub Repository](#)

- Built a full-stack application tracker with dashboard analytics, reducing the manual effort of monitoring internship and job pipelines.
- Integrated Cloudinary file uploads and JWT refresh-token authentication for secure, persistent user sessions.
- Designed a mobile-responsive UI with skeleton loaders and toast notifications, improving perceived performance for first-time users.

Blockchain Voting | React, Vite, Express, Hardhat, MongoDB, Solidity

2025

[Live Demo](#) • [GitHub Repository](#)

- Architected a tamper-proof voting system combining on-chain vote verification with off-chain result storage for scalability.
- Deployed a Solidity smart contract on a local Hardhat blockchain, integrated with MetaMask for wallet-based authentication.
- Implemented JWT authentication and cryptographic receipt verification to secure voter registration and ballot management.

SentinelIX | Python, React, FastAPI, SQLite, Docker

2025

[Live Demo](#) • [GitHub Repository](#)

- Developed a SOC platform that ingests and correlates logs to detect seven attack patterns — including recon, brute force, credential stuffing, lateral movement, privilege escalation, malware indicators, and data exfiltration — with automated incident generation and PDF reporting.
- Built an attack graph visualization engine that automatically reconstructs incident timelines.
- Deployed the full stack via Docker Compose with persistent SQLite storage and real-time streaming log search.

Gift Store UI/UX | Figma

2024

- Designed a complete e-commerce UI/UX case study, from user personas and wireframes to interactive high-fidelity prototypes.
- Built a reusable component library with Auto Layout and design variables, structured as a scalable design system with a cohesive dark, futuristic-African visual identity and typography hierarchy.

TRAINING & CERTIFICATIONS

Python Programming Training — CWG Plc, Lagos, Nigeria (2025)

UI/UX Design Training — CWG Plc, Lagos, Nigeria (2025)

Software Development – Front-End — 720Degree Innovation Hub, Ogun State (Sept. 2024)

LANGUAGES

English, French, Yoruba – Fluent (Speaking & Writing)

ACHIEVEMENTS

- Best Project Award — 720Degree Innovation Hub (3× at Weekly Pitching Presentations)
- Built multiple full-stack, frontend, and UI/UX projects, including production-deployed web applications
- Completed two software development and design internships (CWG PLC and 720Degree Innovation Hub)
